DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Findings of Scientific Misconduct

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: Notice is hereby given that the Office of Research Integrity (ORI) has made final findings of scientific misconduct in the following case:

Catherine Kerr, St. Mary's Hospital: The Office of Research Integrity (ORI) conducted an investigation into possible scientific misconduct on the part of Ms. Catherine Kerr while she was a data coordinator at St. Mary's Hospital, Montreal, Quebec. ORI concluded that Ms. Kerr committed scientific misconduct by falsifying and fabricating the dates of tests or examinations required prior to study entry for one woman entered on the Breast Cancer Prevention Trial (BCPT). She also fabricated laboratory results and falsified dates of laboratory tests used to follow the progress of another woman entered on the trial. The BCPT is coordinated by the National Surgical Adjuvant Breast and Bowel Project (NSABP) and supported by the National Cancer Institute and the National Heart, Lung, and Blood Institute. Because the BCPT is still in progress, no conclusions or results have been published and no clinical recommendations have been based on the results of the study.

Ms. Kerr originally appealed but later withdrew her request for a hearing on the ORI findings and administrative actions, which require that, for a period of three years, any institution that proposes Ms. Kerr's participation in PHS-supported research must submit a

supervisory plan designed to ensure the scientific integrity of her contribution. Ms. Kerr is also prohibited from serving in any advisory capacity to PHS for a period of three years.

SUPPLEMENTARY INFORMATION:

I. Background

Under section 1115 of the Social Security Act (the Act), the Secretary of Health and Human Services (HHS) may approve research and demonstration project proposals with a broad range of policy objectives.

In exercising her discretionary authority, the Secretary has developed a number of policies and procedures for reviewing proposals. On September 27, 1994, we published a notice in the **Federal Register** (59 FR 49249) that specified (1) the principles that we ordinarily will consider when approving or disapproving demonstration projects under the authority in section 1115(a) of the Act; (2) the procedures we expect States to use in involving the public in the development of proposed demonstration projects under section 1115; and (3) the procedures we ordinarily will follow in reviewing demonstration proposals. We are committed to a thorough and expeditious review of State requests to conduct such demonstrations.

On August 16, 1995, the Secretary published a notice in the **Federal Register** (60 FR 158) exercising her discretion to request proposals testing welfare reform strategies in five areas. Since such projects can only incorporate provisions included in that announcement, they are not subject to the Federal notice procedures. The Secretary proposed a 30 day approval process for those provisions. As previously noted, this notice lists all new or pending welfare reform demonstration proposals under section 1115. Where possible, we have identified the proposals being considered under the 30 day process. However, the Secretary reserves the right to exercise her discretion to consider any proposal under the 30 day process if it meets those criteria in the five specified areas and the State requests it or concurs.

Food and Drug Administration

[Docket No. 95N-0259]

Over-the-Counter Drug Labeling; Public Meeting; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of public hearing; request for comments; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a notice that appeared in the **Federal Register** of August 16, 1995 (60 FR 42578). The document announced a public hearing to discuss over-the-counter (OTC) drug labeling issues. The document also solicited comments from interested persons on various aspects of OTC drug labeling that would improve the communication of information to consumers and solicited specific comments and/or data on the costs and benefits of an improved labeling format. The document was published with some errors. The date in which comments are due to the agency, and the date that notices of participation are due to the agency were erroneous. This document corrects those errors and adds a question for public comment which was inadvertently omitted.

FOR FURTHER INFORMATION CONTACT: Ilisa B. G. Bernstein, Office of the Commissioner, Office of Policy (HF-23), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-827-3380.

ADDRESSES: Submit written comments to the Dockets Management Branch (HFA-305), ATTN: OTC Drug Labeling Hearing, Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857, or FAX 301-594-3215.

In FR Doc. 95-20245, appearing on page 42578 in the **Federal Register** of

August 16, 1995, the following corrections are made:

1. On page 42578, in the first column, under the **DATES** caption, in the last sentence "December 29, 1995" is corrected to read "October 30, 1995."

2. On page 42580, in the third column, in the first full paragraph, in line 6, the date "September 11, 1995" is corrected to read "September 15, 1995". Additionally, on the same page, in the second column, after the fifth paragraph, new section "F." is added to read as follows:

F. Process Issue

As part of FDA's ongoing effort to improve OTC labeling, the agency believes that it may have to revise many of the OTC monographs to improve and simplify communication of the information. Because revising the labeling portion of the monographs would be a major undertaking, the agency seeks public comment on the process that should be followed by FDA to ensure that the revisions are completed in an efficient and expedient manner. The agency intends on using its own experts to develop revised language that would be published in a notice of proposed rulemaking (NPRM). The agency also intends to allow a longer than usual comment period of 120, 150, or 180 days, to allow for consumer testing of the proposed language by FDA and other interested parties. Based on the results of the testing and comments received, the agency would then develop a final rule for the monograph(s). The agency would group monographs together, so as to develop a small number of NPRM's for this effort. Please comment on whether this process is appropriate, or if other steps should be taken for monograph revisions.

Dated: September 7, 1995.

Deputy Commissioner for Policy.
